WHAT IS FINANCIAL PLANNING?

Financial planning is the process of providing advice and assistance for the purpose of determining whether and how you can meet your financial needs and lifestyle goals through the proper management of financial resources.

Comprehensive financial planning will include an analysis of your current financial position, investment planning (portfolio design and management, superannuation, borrowings, taxation and legal structures), risk management and insurance, retirement planning and estate planning. Education funding, charitable planning and business succession planning may also be covered as required.

The financial planning process can be applied to meet your needs on a comprehensive basis or a more limited basis (e.g. your superannuation). You need to specify whether you want a full, comprehensive financial plan, or only require limited advice because you do not wish to provide us with all required information or you ask us to look at just one part of your financial affairs.

We may deal on your behalf on an execution only basis (for example, we may purchase financial products specifically requested by you without providing any advice on those products). However, if you do not obtain advice, you face the risk that the financial product/s you select may not adequately meet your objectives, financial situation or needs.
